Career / advanced training

October 2022 - June 2023 | CAS - Frontend Engineering Advanced

HSR Hochschule für Technik Rapperswil

Topics: Code Reviews, Team Leadership, Responsibilities, Design Systems, Cloud Deployment, State-Management, Application Architecture. Technology focus: React

May 2020 - October 2022 | Senior Frontend Engineer for Sanitas ZH via Valtech AG

Together with a team consisting of twelve front end and back end engineers, we develop an in-house enterprise application in the area of offers / application creation. Tech Stack: Vue.js with Composition API, XState, Vuelidate, Tailwind CSS, Javascript, ES6, Webpack, Lodash, Axios, Babel, JSON (backend: Java Spring Boot, SQL - Build: Gitlab, Gitlab Pipeline, Maven, Jenkins)

June 2020 | Foundation of catch and code GmbH

Sept 2018 - March 2020 | Senior Frontend Engineer for Migros Bank via Panter AG, Zürich

With two Scrum teams consisting of developers, PO, Scrum Master and a designer, we implement several sophisticated enterprise business applications on the topics: Online Leasing, Asset Management and Retirement. I also train two juniors in Vue.js, VUEX and CSS / SASS. At the beginning of the third project, I officially achieve the status of "Panter Senior Frontend Developer". Furthermore, I become in-officially the specialist for data visualisations with D3. Thanks to my many years of agency experience, I am also the number one contact for everything related to and around Accessibility, SEO and Large Scale CSS / SASS.

Tech Stack: Vue.js, VUEX, vuex-compose, D3, HTML5, CSS, SASS, Jest, Javascript, ES6, Webpack, Lodash, Axios, Babel, JSON (backend: Java Spring Boot, SQL - Build: Gitlab, Gitlab Pipeline, Maven, Jenkins)

Sept 2017 - Apr 2018 | CAS - Certificate of Advanced Studies Frontend Engineering

HSR Hochschule für Technik Rapperswil

Achieved grade 5.9 (Out of 6) with the final project, a fully reactive Online-Shop application based on Google Firebase and Angular 6 with Jasmine/Sinon Testing Framework. I've been invited later to give a talk about "Vue.js apps as widgets" for the HSR's Front End Best Practices Event 2019. Also talked about component/state de-coupling with VUEX Compose.

Sept 2016 | Foundation sole proprietorship “André Abt – Frontend Engineering”

Started as a Freelance front end engineer and specialist for different agencies, companies and private customers. Achieved a happy customer base including: Herzog & de Meuron, WWF Switzerland, Pro Infirmis, Unic AG, dreipol GmbH, Netcetera AG, RTP AG and many more. Also implemented an Angular based Business Application for the startup: Wemind GmbH.

Jul 2012 - Sept 2016 | Getunik AG, Zürich

Senior Frontend Web Developer Javascript, PHP, HTML, LESS, SASS

Responsible for all front end integrations and coaching of less experienced team members.

Implemented a new workflow and UI Framework, today still used by switch.ch, based on Bootstrap and jQuery based UI Components, Also achieved Gold at “Best Of Swiss Web” with the WWF support.wwf.ch portal. Planned and architected the front end stack for all raisenow.com payment widgets. Revolutionised CMS customer projects development with introducing a new Flat-File CMS based deployment workflow.

Oct 2011 - Jun 2012 | Liip AG, Zürich

Worked in a Scrum team as Frontend Developer for one of Switzerland’s biggest Sunday newspapers. Our project was a Browser/iPad application for the subscribers. Tech Stack was PHP, Symphony, PHPUnit, JS YUI Framework, Buster JS for Unit Testing and LESS.

Sept 2009 - Sept 2011 Zeitgeist Group AG, Aarau

Frontend Web-Developer in a small web agency based in Aarau. Successfully re-launched the website of MSF Médecins Sans Frontières (MSF) “Ärzte ohne Grenzen”.. Achieved full Internet Explorer 6 support with no compromises. The team was only me for all front end implementation and one backend developer for the Typo3 based backend. Tech stack: PHP, MySQL, HTML, Javascript, CSS, jQuery
